

FEM HEALTH & SAFETY MENTORSHIP PROGRAMME

FEM invites all small, medium, and micro-sized policyholders to apply for a mentorship programme. This can be a valuable opportunity for companies looking to empower their employees with skills to complete and implement health & safety (H&S) files, conduct risk assessments and general safety protocols on construction sites.

The programme will be facilitated by FEM's grant recipients in their respective regions. As a result, the mentors will have first-hand experience and knowledge of the construction H&S and can provide advice and guidance to the mentees.

APPLICATION

To apply, each company must nominate one representative and complete the application form with their details. Successful applicants will be contacted by FEM.
